

Bring your project to **life.**

Index

At RJS Electronics, we offer high-quality switches and electromechanical components for a wide scope of industries and applications.

Our expertise lies in LED illuminated switches, but our full range of products includes a variety PCB mount and panel mount components.

ANTI-VANDAL SWITCHES | 1

PCB PUSH BUTTONS | 3

ANTI-VANDAL SWITCHES

IP Rated

Vandal-resistant

LED Illumination

Custom Finishes

Our metal switch category offers a wide range of options, including high current switches, low profile switches, RGB metal switches, and various sizes ranging from 6mm to 40mm.

RJS1N1LP

Our series of **ultra low profile** anti-vandal push buttons with a momentary function, SPST circuit and micro-travel.

RJSX07

Our range of **high current** anti-vandal push buttons, designed for more heavy-duty applications.

PCB PUSH BUTTONS

RGB Illumination

Compact Design

Custom Caps & Legends

Economical

Our PCB push button switches are small and versatile, making them ideal for a wide range of uses, though they are a popular choice for audio visual applications.

SPG

Our **broadcast switches** with vibrant, full face RGB LED illumination and a silent push function.

PB613

Our series of small, economical **LED illuminated push buttons** with a wide range of cap shapes and styles.

LED ROCKERS & TOGGLES

OUR ANTI-VANDAL ROCKERS
AND TOGGLES ARE:

Durable

IP Rated

Stylish

RJS1N1-22RL-XX-Y-BS-ZV-65P

Our **anti-vandal rocker switch** with LED illumination in an array of custom symbols.

RJS-TOG

Our **anti-vandal toggle switch** with an IP67 rating, ring LED illumination and 2 or 3 positions.

LED ILLUMINATED ROCKERS AND TOGGLES

RJS20RCK

Our series of plastic rocker switches, with optional **dot LED illumination** and 2 or 3 position configuration.

RJS-006-TOG-X-12V & RJS-ASW1-DPST-101-X

Our new toggle switches with **dot LED illumination**, two-position latching function and an IP40 rating.

PROGRAMMABLE SWITCHES

RJS-SDE-2

Features an **SPI interface** with **Raspberry Pi** compatibility. This model has a white LED backlight.

THE SDE SERIES FEATURES:

- ✓ Rotary Encoder & Push Button
- ✓ Fully Programmable
- ✓ 1.28" LED Display

RJS-SDE-3

Features a **CAN BUS** compatible interface and an RGB LED backlight, plus an LED illuminated knob type.

RJS-SLD

Features a push button switch and a rotary encoder, with a **digital display** and white **LED backlight**. This switch has a 25mm panel cut out and an IP65 rating.

888

Digital Display

IP65 Rated

OLED Display

Silent Function

RJS-SLC

Features a silent push button switch with a 0.42", 72*40 pixel OLED display. It is fully programmable with an **I2C interface**.

Customisation

ANTI-VANDAL SWITCHES

Our metal switch range offers an extensive selection of finishes designed to cater to diverse requirements.

Laser Engraved Backlit Legends

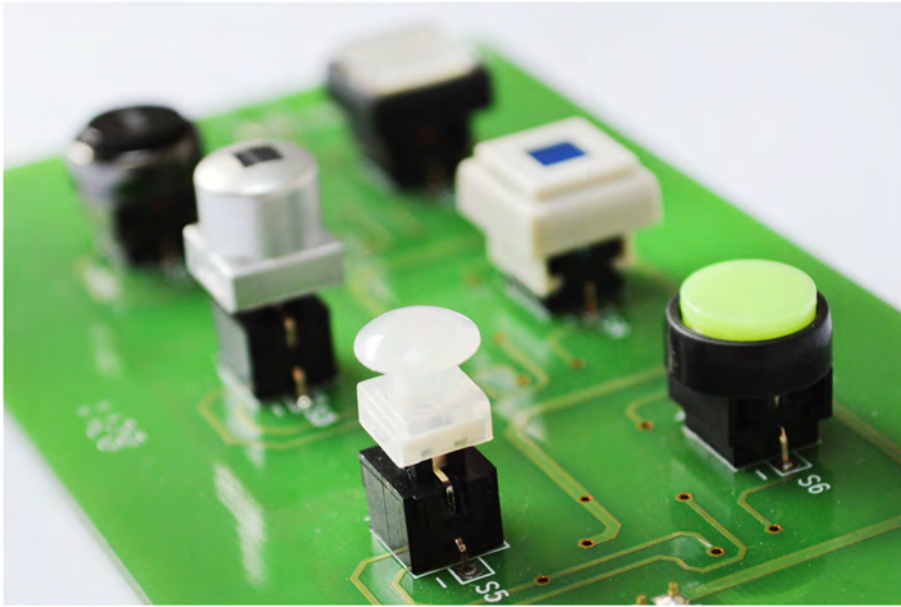

Non-illuminated Custom Symbols/Text

Material Options:

Coloured Anodised Aluminium | Raw Brass | Polished Brass

PCB SWITCHES

Whether you are looking for a specific colour, shape or material, our custom caps provide the flexibility to complement your project design. Plus, you can add custom symbols, logos and text.

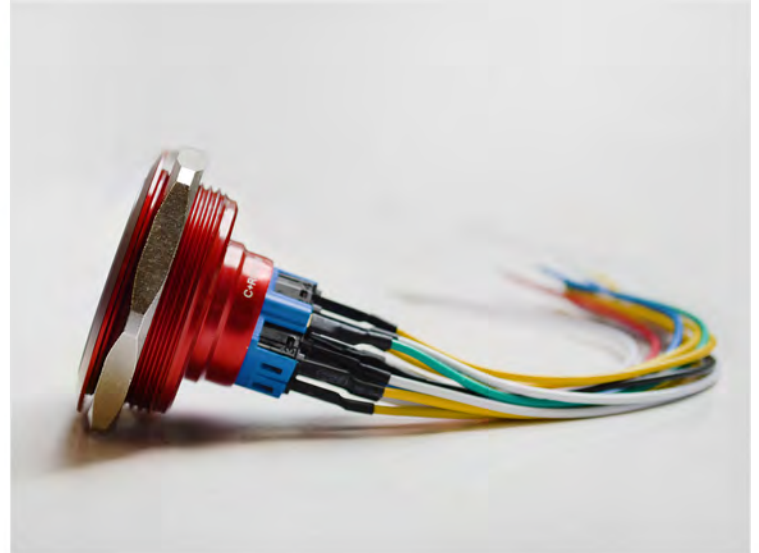

PLASTIC PANEL MOUNT SWITCHES

We offer a range of plastic panel mount switches that feature custom illuminated or non-illuminated logos, text and symbols.

WIRING & CONNECTORS

We can also add custom wiring and connectors to many of our products.
